

RESOL®

Controllers for solar thermal systems

The all-rounder – DeltaSol® MX

Discover the new generation of system controllers for solar thermal systems. Easy combination and parameterisation of pre-programmed function blocks for several millions of hydraulic variants.

- ✓ Intuitive user guidance and status visualisation
- ✓ High-contrast full graphic display
- ✓ SD memory card slot for integrated data logging, transfer of adjustments and firmware updates – even without a PC
- ✓ Integrated control of up to 4 high-efficiency pumps via PWM outputs
- ✓ Up to 5 extension modules via RESOL VBus® (45 sensors and 39 relays in total)
- ✓ Energy-efficient switch-mode power supply

The Apple iPad makes your solar yield palpable – with VBus®Touch, the RESOL app for an optimum system monitoring. Available free of charge on the App Store.
